FORCEFIELD

inline magnetic filtration that removes wear metal

NEW

Only FORCEFIELD magnetic filtration can remove the damaging metal particles in your transmission

**FORCEFIELD
TAKES OUT
99% OF
WEAR METAL**

Particles trapped in the layer of oil between fast-moving parts, gouge, pit and score machined surfaces and generate more particles with each cycle.

Upgrade to DUAL PROTECTION

FORCEFIELD's powerful magnet removes all metal particles from your transmission fluid.

Clean fluid works best

Even the best synthetic fluid, if dirty, can cause damage.

FORCEFIELD keeps fluid working at its best between changes.

Constantly condition your transmission

Because when you install FORCEFIELD onto your spin-on filter, ALL the transmission fluid is cleaned by the magnet as you drive.

Match FORCEFIELD to your remote mount spin-on filters for your Allison transmission.

**Protects for
50,000 miles
(80,000 km)**

**Simply spins
onto your remote
mount spin-on
filter**

Lubricate all gaskets prior to fitting.

Less metal = Less wear

FORCEFIELD
inline magnetic filtration that removes wear metal
