

# MAGNETIC INLINE FILTER

PREVENTS SEALS LEAKING, UNSAFE STEERING & EXPENSIVE REPAIRS

## 1 MAGNET:

Powerful multi-flux magnet captures 99.97% of metal contaminants.

Without MAGNEFINE, untreated particles create a grinding paste that wears out vital parts.

## 2 MEMBRANE:

Micro-fine paper membrane captures remaining non-metallic contaminants.

## POWERFUL DUAL FILTRATION

The inline filter that protects your power steering

For power steering

3820011  
3001012

## DUAL Filtration

for safer, more precise steering. Takes out the particles that cause the wear before the damage is done.

The high pressure power steering pump generates thousands of tiny, hardened wear-metal particles that continue to erode critical surfaces leading to steering failure and costly repairs. **Only Magnefine combats ABRASIVE and EROSIIVE wear.**

### Did you know?

\* It's the tiny wear metal particles (smaller than a hair) that do the damage. They flow freely to all parts of your power steering and jam within the thin film of oil - ripping, gouging and damaging valves and seals. Unless removed they multiply rapidly and damage increases.

Almost all power steering systems are **UNFILTERED!** Protect yours today.\*

**INLINE PROTECTION:** MAGNEFINE installs inline and forces ALL fluid to be continually cleaned by passing over the powerful magnet.

**FAST RESULTS:** Cleans pumps, valves & fluid within hours; **STOPS** steering wear - increases safety.

**LONG LASTING:** Protects for 20,000 miles. (30,000 km)

**SAFETY BYPASS:** Maintains FULL-FLOW under all operating conditions.

**RACE & FLEET PROVEN:** From racetrack to fleet, MAGNEFINE is proven in over 12,000,000 miles of fleet testing.

**TRAN-STEER INC.**
